

NATHIRE ANSAAR

SOFTWARE ENGINEER

ABOUT ME

Driven and passionate Software Engineer with hands-on professional experience building and maintaining backend systems in fast-paced, client-facing environments. Committed to clean code, continuous learning, and delivering reliable, well-structured solutions.

EDUCATION

BSc (Hons) Software Engineering

2021 - 2024

University of Mauritius

PROJECTS

Project Allocation (Dissertation)

A website to allocate projects for final year students and additional complex features. ASP.NET MVC has been used as framework. Dapper has been used to access data from database and SQL Server has been used for database.

WORKING EXPERIENCE

Internship | Versusmind Indian Ocean

Oct 2023 - Dec 2023

The Business Exchange, 1 Cybercity

Worked on a project using ASP.NET technology stack. Objectives were to apply .NET principles and guidelines to develop a website.

Key Features : Database Connection, User Authentication, Data Management, Basic personalisation per user.

Software Engineer | RAPP (Omnicom Group)

Dec 2024 - Present

Mobile Wallet - (.NET) Contributed to a Mobile Wallet platform as part of my first professional project. Worked with .NET technologies within a structured, layered architecture, focusing on clean code principles, best practices, and understanding real-world backend development workflows.

Key Technologies: .NET, C#, SQL

RAPP.COM - (.NET & Umbraco) Worked on the RAPP.COM platform, a CMS-driven web project built with Umbraco on a .NET stack. Gained experience integrating backend .NET services with a content management system and contributing to a production web environment.

Key Technologies: .NET, C#, Umbraco CMS

Mercedes-Benz UK Online-Sales-Platform - Working on backend systems for a large-scale automotive client. Involved in building and maintaining APIs and data management platforms, collaborating closely within an agile team to deliver features across multiple interconnected services.

Key Technologies: .NET 10, C#, AWS, ServiceStack, MySQL
